Work Experience

Ameritas (Lincoln, NE)

Ameritas is a insurance company for Life, Dental, and Hearing

QA Consultant (April 2019 - Present)

Driving the business by owning responsibility for Information Technology quality assurance and quality control. Act as a Q.A. professional to ensure quality in all project activities and deliverables. The focus for this role is on defect prevention and continuous improvement. QA is responsible for creating an end-to-end test plan; executing the plan and managing all activities in the plan to ensure that all the objectives are met and that the solution works as expected. Perform testing on solutions with respect to functionality, performance, reliability, stability and compatibility with other legacy and/or external systems.

Essential Job Functions

Develop, write, and communicate test plans.

Responsible for developing and executing tests for assigned work

Coordinate testing efforts across multiple projects; reviewing all testing standards; and escalating concerns to the Principal Quality Analyst or Manager.

Oversee defect lifecycle

Participate in production verification and checkout.

Provide input into planning, designing, and executing tests for manual testing

Provide training, mentoring, and guidance to other team members

Determine and develop the testing approach to solutions

Research requirements and validate proposed approaches

Conduct reviews ensuring testability, accuracy, and consistency of requirements, technical designs and test grids

Organize and facilitate testing risk analysis

Identify opportunities for continuous improvement within the QA/QC domain

MacPractice (Lincoln, NE)

MacPractice is a medical software company for Mac computers.

Quality Assurance Technical Lead (Team Lead) (July 2018 - April 2019)

QA Technical Lead creates a technical vision for the QA department and may take on roles of the manager when needed. The Technical lead needs to keep up with how QA is testing to stay in touch. The Technical Lead focuses on the technical aspect of QA and helps with technical debates. They help to train and support the QA team as well as help them grow by finding new tools, creating trainings, and writing technical documentation. The Technical Lead also takes on task and tools as assigned such as the build system, learning and implementation of automated test for API and UI.
